EDUCATION

B.S. in Computer Science
SD School of Mines & Technology
Graduated May 2022

- Magna Cum Laude (3.71 GPA)
- Dean's List, six semesters
- Tau Beta Pi & NSLS member

SKILLS

LANGUAGES

C# JavaScript SQL HTML CSS

WEB APPS

ASP.NET Core Blazor SvelteKit
Bootstrap REST APIs

ARCHITECTURE

Distributed systems Queues
Background services TDD

CLOUD / DEVOPS

Azure Cloudflare Workers D1 R2
CF Queues Docker CI/CD

DATA

SQL Server PostgreSQL Cosmos DB
EF Core DbUp

TOOLS

Git GitHub Azure DevOps
GitHub Actions Azure Pipelines

AI DEVELOPMENT

Copilot Claude Code Codex
Issue planning Rapid prototyping

EXPERIENCE

Omnitech Inc., Software Engineer *Aug 2024 - Present*

- Contracted across **multiple simultaneous** client projects and domains
- Onboarded to **unfamiliar codebases** quickly and contributed immediately
- Built **full-stack applications** from scratch across varied tech stacks
- Maintained and modernized **legacy systems** for multiple clients

Innovative Systems, Software Developer *June 2022 - Jul 2024*

- Spearheaded **Blazor** integration
- Created several full stack applications with **ASP.NET** backends
- Maintained several **Azure DevOps** CI/CD pipelines
- Practiced **agile** development with three week sprints
- Created internal **reusable packages** for use in several projects

patientMoon Wellness Marketing, Software Developer *Aug 2021 - Aug 2023*

- Worked as a **freelance** developer through Upwork
- Coordinated with **fully remote** team
- Helped define a **GIT** branching strategy
- Introduced and implemented **SOLID** practices
- **Adapted** seamlessly to both internal and client applications

PROJECTS

Client Configurable Web Apps *Full Stack Dev & DevOps*

- Designed and written with the **ASP.NET** and **Blazor** frameworks
- Fully **configurable** and **rebrandable** after deployment by clients
- **Removed dependency** on developers to customize applications for clients
- Designed and implemented **SQL** database with **Entity Framework**
- **Integrated** with several other applications
- Successfully **decreased deployment time** from ~400 hrs to ~8 hrs

patientMoon Portal *Full Stack Developer*

- Maintained **ASP.NET** backend and **Blazor** frontend
- Integrated with **Airtable** database
- Added many **new features** in the UI and API
- Introduced **automated testing** and wrote many tests
- **Streamlined architecture** for easier future changes
